Compact Gasket Cutter

Clean cuts. Correct fit.
No waiting.

AX2000 Shown

On Demand

When the replacement gasket you need is not on the shelf, make it on the spot. The Allpax Compact Gasket Cutter creates clean inside and outside diameters from 1/4 inch (6mm) to 6 inches (152mm) and can also cut straight strips from sheet gasket material.

Its compact, manual design requires no electricity or programming, so it is ready at the workbench, in the maintenance shop, or wherever the repair takes place.

Compact By Design. Ready For Real Repairs.

One compact tool gives technicians, tradespeople, and repair focused DIYers more control over gasket size and timing. Set the desired diameter using the inch or metric scale, select the appropriate blade profile, and cut the gasket from the sheet material chosen for the application.

Four included blade styles handle general cutting as well as very thin, rigid, and tougher materials. A durable metal case keeps the cutter and components organized between jobs.

Two Kits. One Compact Cutter.

Choose the standard kit when you already have a suitable cutting surface, or select the complete kit with a dedicated 6” x 6” self-healing cutting board.

INCLUDES	AX2000	AX2010
Cutter block assembly	●	●
Various blade styles	●	●
Three center pins	●	●
Pivot post assembly	●	●
Metal storage case	●	●
6" x 6" cutting board		●
Installed center pin ferrule		●

The AX2010 kit board has a textured, non-sip surface designed to reduce blade friction, minimize blade breakage, and self-heal after use. All other listed cutter components are common to both kits.

AX2000

A portable, manual gasket-cutting solution for users who already have a suitable cutting surface.

BEST FOR:

- Maintenance toolboxes
- Field and shop repairs
- Users with existing cutting board
- Maximum portability

AX2010

A complete cutting setup with a dedicated 6"x 6" work surface and installed center-pin ferrule.

BEST FOR:

- First-time gasket cutter buyers
- Workbench and home-shop use
- A consistent, ready-to-use setup
- Users who want the board included

SPECIFICATIONS

Cutting Range
1/4" (6mm) to 6" (152mm) OD

Measurements
