# Light-Duty Gasket Cutter Kit

Clean cuts. Correct fit.
No waiting.

## On Demand

Make the gasket you need when the job calls for it. Allpax Light-Duty Gasket Cutters provide a practical, manual solution for cutting circular gaskets without relying on pre-cut inventory or outside fabrication. Set the desired diameter using the adjustable cutting radius and inch or metric indicators, then make clean, repeatable cuts.

## Built for Practical Gasket Fabrication

The Light-Duty Gasket Cutter combines straightforward operation with the flexibility to handle a range of gasket sizes. A manual cutter block, adjustable cutting radius, and blade options give users the control needed to produce custom circular gaskets in the shop or at the work site. The included storage case keeps the cutter and components organized between jobs.

Choose the cutter configuration that matches the job. From the compact AX3000 through the extended-range AX3030, the Light-Duty family lets you select the cutting capacity and included accessories that fit your needs.

# Light-Duty Gasket Cutter Kit

The Allpax Light-Duty Gasket Cutter family offers four configurations. Select the AX3000 for a streamlined setup, add the cutting board with the AX3010, extend your cutting range to 25" with the AX3020, or go up to 37" with the AX3030. Every configuration is manually operated and uses inch/metric cutting indicators for straightforward setup.

| INCLUDES | AX3000 | AX3010 | AX3020 | AX3030 |
|---|---|---|---|---|
| Maximum circular flange OD | Up to 13" (330 mm) | Up to 13" (330 mm) | Up to 25" (625 mm) | Up to 37" (940 mm) |
| Cutter block assembly | ● | ● | ● | ● |
| Cutting blades | 2 | 7 | 7 | 7 |
| Three center pins | ● | ● | ● | ● |
| Pivot post assembly | ● | ● | ● | ● |
| Metal storage case | ● | ● | ● | ● |
| 18" x 18" cutting board | | ● | ● | ● |
| Installed center pin ferrule | | ● | ● | ● |
| Extension bar | | | 1 | 2 |

Each kit uses the same basic Light-Duty cutter platform, with accessories that expand the cutting range and setup. AX3000 provides a streamlined option for applications up to 13" OD. AX3010 adds an 18" x 18" cutting board, while AX3020 and AX3030 add extension bars for cutting up to 25" and 37" OD, respectively. The included board features a textured, non-slip surface designed to reduce blade friction, minimize blade breakage, and self-heal after use.

## AX3000

**BEST FOR:**
Users who need a cutter for applications up to 13" OD and already have a suitable cutting surface.

## AX3010

**BEST FOR:**
Users who want a complete 13" OD cutting setup with the cutting board included.

## AX3020

**BEST FOR:**
Larger gasket applications up to 25" OD where additional cutting reach is required.

## AX3030

**BEST FOR:**
Large-diameter gasket applications up to 37" OD requiring maximum cutting reach.
